

Detailed Board breach report: BR-000003

Organisation: Acme Retail Pvt Ltd
Generated at: 2026-09-02T10:05:15.040Z

Rule 7(2)(b) details

Updated description: Unauthorized access to the marketing contact database detected during a routine audit. Re-run verification breach for steps 22-28.

Broad facts: On 27-28 August 2026, an unauthorized third party accessed the Marketing Communications database via a compromised API credential and exfiltrated contact records (name, email, phone) for 114 data principals. Discovered by internal audit on 2 September 2026.

Mitigation measures: Credential rotated, affected endpoint firewalled, forensic review of all access logs for the preceding 30 days in progress, affected principals being notified.

Findings on person who caused it: The credential belonged to a third-party marketing automation vendor; investigation into whether the vendor's own systems were compromised is ongoing with the vendor's security team.

Remedial measures: Vendor API credentials will be moved to short-lived tokens with IP allow-listing; a quarterly access review of all vendor integrations touching the Marketing Communications database will be instituted.

Intimations to affected Data Principals (BR-13)

Affected principals: 114

DELIVERED: 114

Counts are drawn from CampaignRecipient delivery records; no delivery is claimed without an underlying record.

Obligations

BOARD_INITIAL: OVERDUE — due 2026-09-02T09:30:00.000Z — Rule 7(2)(a) requires intimation "without delay"; the number is the company's target (INTERNAL_TARGET)

PRINCIPAL_NOTICE: PENDING — due 2026-09-03T03:30:00.000Z — Rule 7(1) requires intimation "without delay"; 24h is the company's operational target, not a statutory figure (INTERNAL_TARGET)

BOARD_DETAIL: PENDING — due 2026-09-08T06:30:00.000Z — Rule 7(2)(b): detailed information within 72 hours of becoming aware, unless the Board allows longer on written request (STATUTORY)

The platform does not file this report; a responsible employee must review and submit it to the Board.
